Sourcing Quotations from Reputable Chinese Space Frame Vendors

Dear Sir/Madam,

We, [Xuzhou Green International Trading Co.,Ltd], hereby confirm our commitment to sourcing quotations exclusively from highly reputable Chinese space frame manufacturing vendors for your steel structure project. Our assurance includes the following: Compliance with Recognized Standards:

All prospective vendors will be required to adhere to the Chinese National Standards (GB) for steel structures and hold valid ISO9001:2015 certification for their quality management systems. Strict Material and Manufacturing Quality:

Vendors shall provide documentation verifying the use of certified steel grades (such as Q235B or Q355B) and ensure all welding meets the requirements of Chinese GB standards and, where applicable, American Welding Society (AWS) standards. Surface treatment for all exposed components will meet the required anti-corrosion specifications (e.g., hot-dip galvanizing, Dacromet). Inspection and Documentation:

All space frame components will be subject to comprehensive dimensional accuracy checks and quality inspections prior to delivery. Vendors must supply batch-wise certificates, mill test reports, and inspection records for review. Vendor Selection Criteria:

We will solicit quotations only from established manufacturers with documented experience in large-scale space frame projects, especially for industrial applications such as cement plants and raw material storage sheds. All proposed vendors will have proven capacity for international exports. Documentation Submission:

We will submit to you all vendor documentation regarding material certification, manufacturing quality, surface treatment, and inspection results for your approval before proceeding to procurement. We look forward to your confirmation on these arrangements and remain committed to ensuring the highest quality standards in your project for SWATHI BUILD TECH PVT LTD., Hyderabad.

Yours sincerely,

Ely Yu
